FORD TRANSIT
SOLAR POWER TECHNOLOGY

Ford Transit Solar Packages

STW - 495 Watt 3-Panel Kit

STW - 660 Watt 4-Panel Kit

Additional Energy Storage

- 3KWH lithium pack
- Automotive grade
- Fully independent from engine power

Built for all-weather and vehicle use conditions, our Solar Power kits come with a 5-year system warranty. Using the latest in MST® grid technology, it's designed to be flexible and lightweight, while still being rugged for commercial applications.

With an additional compressor installed, our solar kit installations can also power a secondary AC system with the engine off.

Standard Features

- Powers electronics & charges tools
- Power inverter supplies up to 3,600 watts
- Capable of running AC system (with auxiliary compressor)
- Extends vehicle battery life
- No jump starts ever
- Highest efficiency panels on the market
- Eliminates idle and improves MPG efficiency
- Reduces emissions
- 80% lighter than glass materials
- 2.5X power density vs thin-film
- Maintenance-free, lightweight solution
- Plug & play installation
